PRIMARY EXAMINER

DETAILED ACTION

1. Claims 1-31 are presented for examination.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or discuss using a file controller for managing or controlling cache extents. Cache IDs are generated to include a hierarchical level of an object stored in the cache and an object identification for identifying the objects of each hierarchical level from each other object. A cache header table is generated, the cache header table contains the cache IDs and unique keys, indicating the relationship of the cache IDs and the cache extents in each hierarchical level. The unique key is used to bind the cache extent of a disk block, an object or file to one another. The cache header table is searched when a client machine attempts access of a disk drive using the cache ID and the unique key of the object.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
